SUMMARY

Final year at COEP Technological University, with a completed AI and BI internship at Two Brothers Organic Farms and hands-on expertise across SQL, Power BI, Tableau, and AI-integrated workflows. 5 analytics projects delivered, each with a live dashboard, a full executive report, and measurable business outcomes. Focused on building decision-support systems that executives can act on immediately, not just visualizations.

EDUCATION

COEP Technological University | Pune, India Aug 2023 – Present

B.Plan – Urban & Town Planning | Minor: Computer Science | CGPA: 7.74 / 10.0

EXPERIENCE

Two Brothers Organic Farms May 2026 – Jul 2026

AI and Business Intelligence Intern | Cybercity Magarpatta, Pune, India

- Deployed AI-implemented QR code traceability for 4 products via Netlify serverless functions and Airtable REST API; engineered a 5-model demand forecasting engine (WMA, SES, DES, SARIMA, Croston) for 175 SKUs × 5 channels with MAPE-based auto-selection, SKU lifecycle state machine (Active/Seasonal/Discontinued), and standalone HTML web app delivery.
- Collected and consolidated 200+ fragmented, unstructured operational data sources into a centralized single repository — cleaned, analyzed, and engineered normalized SQL and Excel databases with star schema modeling; built domain-specific master databases for sales, production, quality, inventory, and logistics; established Power Query M-code ETL pipelines with live SharePoint-connected incremental data refresh into Power BI.
- Architected a 37-page interactive Power BI dashboard with 200+ DAX measures structured in end-to-end business workflow order: Demand Forecasting → Production (8 product lines) → Operations (EGA, In/Outsourced) → Inventory (DOH/SOH) → Supply Chain (RM & PM) → COGS → Logistics TAT (O2S, S2D, S2A, O2A) → D2C domestic & international → Daily/Weekly reports; proactively met every dashboard stakeholder one-on-one across operations, logistics, production, and finance — understood their decision workflows, data needs, and KPI priorities before designing audience-specific visualizations from requirements up; configured automated scheduled delivery to stakeholder inboxes daily.

CodeClause Jun 2025 – Jul 2025

Data Science Intern | Remote, India

- Completed 2 end-to-end NLP text classification pipelines applying NLTK/SpaCy and Scikit-learn for feature engineering, model training, hyperparameter tuning, and performance evaluation on real-world datasets.

Udgam – Annual Entrepreneurship Summit, IIT Guwahati Nov 2024 – Jan 2025

Campus Ambassador | Remote, India

- Drove campus outreach campaigns across digital and physical platforms, boosting registrations for Pitchers, Hackathons, and E-Talks events across multiple campus communities.

PROJECTS

AI and Business Intelligence – Two Brothers Organic Farms | *Power BI, DAX, Power Query M, SQL, Excel, Netlify, Airtable REST API, SharePoint* May – Jul 2026

↳ Project Link

- Deployed AI-implemented QR code traceability for 4 products via Netlify serverless functions and Airtable REST API; engineered a 5-model demand forecasting engine (WMA, SES, DES, SARIMA, Croston) for 175 SKUs × 5 channels with MAPE-based auto-selection, SKU lifecycle state machine, and standalone HTML web app delivery.
- Consolidated 200+ fragmented operational sources into normalized SQL and Excel databases via Power Query M-code ETL; built star schema data model with SharePoint-connected incremental data refresh; delivered a 37-page Power BI dashboard with 200+ DAX measures spanning 10 analytical domains; configured automated scheduled dashboard delivery to concerned stakeholder inboxes at fixed daily intervals.
- Impact: achieved 100% product traceability across 4 SKU lines; consolidated 200+ scattered data sources into a single repository eliminating manual cross-system lookups; achieved 91.8% average forecast accuracy across 175 SKUs × 5 channels; replaced manual stakeholder reporting with automated daily dashboard delivery.

British Airways – Customer Sentiment Analysis | *Tableau, Tableau Public* Mar 2026

↳ Project Link

- Analyzed 2,000+ customer reviews (2017–2023) using Tableau, surfacing a 4.2/10 average rating and identifying Seat Comfort (2.9/5) and Value for Money (2.8/5) as the two lowest-rated service dimensions.
- Correlated Boeing 787 & 777 aircraft with significantly higher satisfaction scores, providing data-backed justification for fleet upgrade prioritization; published live interactive dashboard on Tableau Public.

Netflix Content Analysis | *SQL (PostgreSQL)* Feb 2026

↳ Project Link

- Executed 15+ advanced PostgreSQL queries (CTEs, window functions, subqueries) to analyze 8,807 titles across 150+ countries, revealing a 69.6% vs. 30.4% movie-to-TV split and identifying India as a top growth market at 11.9% of total catalog.
- Automated data transformation workflows reducing manual reporting time by 30%; developed 8-visualization analytics dashboard identifying International Movies (31.3%) and Dramas (27.6%) as dominant genre categories.

Telco360 – Customer Churn Analytics | *Excel, Julius AI, Manus AI, Tracelight AI* Jan 2026

↳ Project Link

- Applied statistical analysis on 7,043 customer records to surface a 26.54% overall churn rate, a 16× retention gap between contract types (42.71% vs. 2.83%), and a 47.68% first-year churn concentration — identifying fiber optic segment at 41.89% as highest-risk cohort.
- Quantified $1.2M annual revenue at risk; delivered a live BI dashboard and 4 data-backed retention recommendations targeting an estimated 15–20% churn reduction.

BevAnalytica – US Beverage Revenue Tracker | *Power BI, DAX, Power Query, Geospatial Mapping* Nov 2025

↳ Project Link

- Engineered an interactive Power BI dashboard tracking $8M annual revenue and 16.45M units sold across all 50 US states, leveraging DAX measures, geospatial mapping, time-intelligence functions, and multi-dimensional data modeling.
- Statistically identified a 2× summer revenue surge ($0.5M/mo → $1.1M/mo); pinpointed CA, TX, FL accounting for ~40% of total revenue; delivered 6 strategic distribution and pricing recommendations.

TECHNICAL SKILLS

Tools & Technologies: SQL (PostgreSQL), Power BI, DAX, Power Query M, Tableau, Microsoft Excel, SharePoint

AI & Automation: Julius AI, Manus AI, Tracelight AI, Netlify Serverless, Airtable REST API, MS Copilot, Claude AI

Domain Knowledge: Business Intelligence, Data Analytics, Statistical Forecasting, ETL Pipelines, Data Modeling, Supply Chain Analytics, Executive Reporting

Languages: English (Full Professional) | Hindi (Professional Working) | Marathi (Native) | Japanese (Basic – Introductory)

CERTIFICATIONS

- SQL (Advanced) – HackerRank | Oct 2026 • SQL (Intermediate) – HackerRank | 2026 • SQL (Basic) – HackerRank | Dec 2025
- BCG – Data for Decision Makers (Forage) | Mar 2026 • Forage Academy – Data Labeling (Forage) | Feb 2026
